ENGINEERED FOR FREEDOM

Dynamic first touch: PES 2013 introduces subtle ways to receive the ball, from traps, gently lifting it past an attacker to run on to, or a variety of other moves. First touch is everything and players can trap the ball using the R2 button, killing the speed of a well-timed pass and bringing it instantly under control, or using the momentum of the pass to turn a defender.

Full manual shooting and full manual passing: PES 2013 offers fully manual shooting and for the first time ever manual shooting, allowing users to determine the height and power of each. Long low passes can be sent skimming across the pitch, while shooting the ball from behind control over where the shot is placed. Skill and precision are needed to master these, but passes can be made into open areas, allowing loose strikers to finish, while offering an unrivalled variety in ways to score.

Dribbling: The speed with which a player moves with the ball has been slowed in line with real matches, but using R2 allows players to add various styles to their close control. Players can vary the speed of their dribbling, and cushion the ball as they move freely within a 360-degree circle. The new system allows players to knock a ball past a player and collect it, nutmeg them, or hold up play by spinning the ball as team mates find space and make runs.

Full manual one-two: Active one-two passes can be made, with the second player being moved in any direction, facilitating various tactical movements.
